

Lyclear Treatment Shampoo

How to get rid of head lice with Lyclear Treatment Shampoo

How to use

1

Check dry hair lock by lock for head lice using the enclosed anti-lice comb. To avoid re-infestation, carefully clean the comb in lukewarm soapy water.

2

Shake the bottle before use. Apply enough Lyclear Treatment Shampoo evenly onto dry hair. Be sure to cover all the hair and scalp with a thick layer of the product. Massage well from the roots to tips paying particular attention to the neck and behind the ears. Leave on for 15 minutes.

3

Before washing the hair, comb thoroughly with the Lyclear anti-lice comb to remove the lice and eggs. Regularly clean the comb.

4

Add enough water to the hair to work up foam. Wash and rinse the hair thoroughly. Be sure to rinse everything out. Style the hair as usual.
